## New Members Co-ordinator's Report AGM 2018

Rapid growth would summarise the year for Canine Friends Pet Therapy with 434 applications resulting in 287 new members and 39 applicants still being processed for that period. Note the many applications that are received and either withdrawn, or the dog and/or owner doesn't pass our assessment, or the dog is simply too young (108).

Nina Hawke stood down from the role of New Co-ordinator role (in April 2018) and I am temporarily standing in until a new member co-ordinator is appointed:

- There were 287 (compared to last year's 195) new members throughout New Zealand, with the largest number in Auckland with a total of 64 (compared to last year's 48) new members. Well done Rachel, Kim \& Nicole.
- We have expanded from 25 to 30 regions.
- Last year, Nina predicted that we should expect to have up to 300 new members by March $31^{\text {st }} 2018$. She was close with 287 . Our prediction for 2018-19 based on the current run rate is 330 .

The following table shows the distribution of applicants and workload. Please note that applicants still being assessed or that we are awaiting payment from are not included.

The number and variety of new members are a testimony to the great work being done by our Liaison Officers throughout the country. It is a pleasure working with these dedicated and passionate people - who give so generously of their time to ensure we can induct and get quality pet therapy teams up and operating as quickly as possible to meet the demand from homes, hospitals and hospices.
